

CLGLR6 Trims

| Trims for LR6 |

Product Description

The LT6 trim accessories are designed to snap onto LR6 downlight modules and provide a clean aperture appearance. They are available in a number of color options to compliment the interior design. They actually decrease high angle brightness with minimal effect on the fixture output.

Performance Summary (LR6 Module)

Spun aluminum trim with diffuse anodized finish.
Room-facing flange is painted white.
Injection molded retaining ring allows for positive attachment to the LR6 family of modules.
